Response to Amendment

The declaration under 37 CFR 1.132 filed March 24, 2005 is sufficient to overcome the rejection of claims 1-3,6,22-29 based upon 35 USC 112, first paragraph.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3,6,22-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-45 of U.S. Patent No. 6,761,729. Although the conflicting claims are not identical, they are not patentably distinct from each other because the use of non-contact standing waves would inherently result in the distance *d* as set forth and the elimination of another form of energy and its associated function would have been obvious. Furthermore, the use of air as an ultrasonic coupling medium in a therapeutic device is known.

Claims 1-3,6,22-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 6,533,803. Although the conflicting claims are not identical, they are not patentably distinct from each other because the use of non-contact standing waves would inherently result in the distance *d* as set forth and the elimination of another form of energy and its associated function would have been obvious. Furthermore, the use of air as an ultrasonic coupling medium in a therapeutic device is known.

Response to Arguments

Applicant's arguments with respect to claims 1-3,6,22-29 have been considered but are moot in view of the new ground(s) of rejection.
